

On May 5 (Sunday) , 2024, at Nihongi-Toge, at the moment of Nihongi-Toge Mountain opening, the“mountain azalea watching festival” was effected. During some years in the past only festival was executed owing to Corona Epidemic, but at last Mountain Azalea watching festival was revived. Music band performance, fula dancing and Japanese drums, etc. were showed off on a special stage. There were seen the audience on the guest seating, and hikers who passed by chance . . . really big audiences enjoyed.

The appearance in which the trees were swaying at rather strong wind blowing reminded us that the mountain gods were also cheering up our watching with this laugh festival.
