

On June 30(Sunday), 2024, making use of the forestry road of Mido region Higashi-Chichibu fire fighting brigade made a summer training (relay training). This training was done aiming, upon occurrence of disaster, prompt grasping of the actual status and increasing of the capacity to share

the information among fireman members, immediate hose extension, water conveyance relay and smooth handling of equipment and tools. The members trained themselves seriously to extend the hose in about one kilometer paying close attention to water conveyance pressure. We will grade up fire

fighting technique and boost morale through this training so that we may just meet the citizen' s requirements in the event of emergency.
