

My hobby is skiing. At my high school period I experienced skiing for the first time on my trip. Becoming an adult, I could go to everywhere freely with my car, so at my younger age I often went to the skiing resorts in Niigata and Nagano Prefectures. I think the charm of skiing exists in its sense of speed. You can feel nice skiing at a high speed in the nature. It is wonderful to make an uproar with your friends when you are staying over. I participated in a competitive skiing tournament. I got a victory in skiing down the slope (Alpine skiing). Since I got married, I enjoyed skiing with my family, after that I did not go skiing for some time, but recently I am skiing in Shirakaba 2 in 1 skiing resort in Nagano Prefecture.

When I started skiing, the time was in the midst of skiing boom, the movie with hit song “Take me skiing” spurred on that boom. Because of this atmosphere they say that a skier attracts girls, it was not the case with me absolutely (laugh).

#### **“Thanks” are rewarding words to me**

I am in the status of Representative Director of Takano Kensetsu Limited Company since the year 2019. Takano Kensetsu is an exterior construction company which undertakes principally civil engineering, fence making and landscape architecture.

In the village we engaged in stage making of annually opened Washi-no-sato Culture Festival, and engaged in the thatched roof restoration work of Japanese Paper making house. In Saitama Prefecture, with relationship with a shrine carpenter, with whom we have done the restoration work of Japanese paper making house together, we participated in the repair and restoration works of the cultural assets, and at present we engage in the repair of foundation part of sculpture of Chichibu Shrine.

In addition to these works, we are favored with many works within and without our village. We feel rewarded when we hear the words of thanks from our clients. We feel also rewarded, when our clients call for other clients in accordance with the increment of our credibility. Now and in the future we do our best jobs without getting in an accidents.
