

On October 15 (Tuesday), 2024, 5th grade pupils experienced rice harvesting under the guidance by Mr. Kunitoshi Ebara (Okusawa), Mr. Yasuo Fukushima (Okusawa) and Mr. Yoshinori Suzuki (Kaiya). In the past spring they planted rice seedlings being covered with mud. Overcoming rain, wind and summer heat the rice has grown up. The pupils cut the rice straw from the root with small sikles. It was a meaningful experience to engage in rice production from plant seedling to rice harvesting.
